Backend Engineering Specialist with 5+ years of experience architecting high-performance distributed systems serving millions of users. Proven track record of delivering enterprise-grade solutions with 99.9% uptime and 25% cost reduction. Expert in resilient APIs, database optimization, and microservices with Java, Python, Node.js, MongoDB, and Kafka.

PROFESSIONAL EXPERIENCE

Hirerkey - Co-Founder & CTO

January 2025 - Present

- Co-founded and led technical strategy for an AI-based Human Capital Management (HCM) platform based in Dubai, successfully securing a \$2.5 million valuation
- Architected and engineered the core system leveraging Java, Python, Node.js, MongoDB, and Kafka for high scalability
- Developed and integrated advanced AI/LLM and RAG models to automate human resources workflows and enhance data retrieval

Noisiv Consulting - Consulting CTO

June 2023 - Present

- Architected backend systems handling millions of daily API requests with 99.9% uptime using Java, Python, and Node.js
- Optimized database schemas reducing response times by 60% and improving throughput by 45% using MongoDB and PostgreSQL
- Engineered a robust queuing system with Kafka and Redis, processing 75,000+ messages per second with sub-50ms latency, thereby improving data delivery speed and application responsiveness for all users.
- Established architecture standards reducing technical debt by 40% while improving system reliability

Qid - Technology Lead

September 2021 - November 2024

- Led development of digital check-in solution processing 100,000+ verifications in six months
- Designed architecture for high-volume traffic in limited connectivity environments
- Led 5 engineers, integrating with India Stack for compliance and scalability
- Implemented Redis caching, reducing database load by 40%

Noisiv Consulting - Partner Technology Manager

September 2021 - June 2023

- Managed technology lifecycle for 20+ clients across multiple countries
- Implemented MongoDB and Kafka solutions boosting performance by 35%
- Deployed microservices reducing downtime by 60%

KEY PROJECTS

Qid - Secure Digital Check-in Platform

May 2022 - November 2024

- Built a distributed system handling 10,000+ daily verifications with 99.9% uptime in limited connectivity environments
- Implemented real-time data synchronization using Kafka and Redis for seamless operation across multiple regions
- Designed scalable architecture capable of handling traffic spikes of 5x normal load during peak hours

Sounf - Project Workflow Platform

September 2022 - Present

- Developed a platform centralizing project workflows for social media marketers, improving productivity by 40%
- Implemented MongoDB for flexible data storage and Redis for caching, supporting thousands of concurrent users

TECHNICAL EXPERTISE

Programming Languages

JavaScript/TypeScript, Java, Python, Golang

Cloud & DevOps

AWS, Docker, Kubernetes, CI/CD, Microservices, Terraform, Jenkins

Frameworks & Libraries

React.js, Node.js, Express.js, Spring Boot, Angular.js, NestJS, Flutter

AI & ML

Custom Models, RAG Models, Fine-tuning, LLMs, Vector Databases

Databases & Messaging

MongoDB, Redis, Kafka, MySQL, PostgreSQL

Leadership & Methodologies

Team Leadership, Agile/Scrum, System Design, Distributed Systems, Technical Roadmapping

CERTIFICATIONS & ACHIEVEMENTS

- McKinsey.org Forward Program, McKinsey & Company - July 2025
- Strategy Consultant Job Simulation, BCG - March 2025
- Apptio Cloudability Technical Sales, IBM - December 2024
- Turbonomic Technical Sales, IBM - January 2023
- CS50, Harvard University - March 2020
- JavaScript Algorithms & Data Structures, freeCodeCamp - 2020
- Responsive Web Design, freeCodeCamp - 2019

EDUCATION

Bachelor of Science in Information Technology, Jamia Hamdard, New Delhi

GPA: 3.45/4.0

College Conference Society Member, IT Club Member, Hackathon Participant
